INDUSTRIAL METAL-WRAPPED FLOATING SHELF 24" INSTRUCTIONS

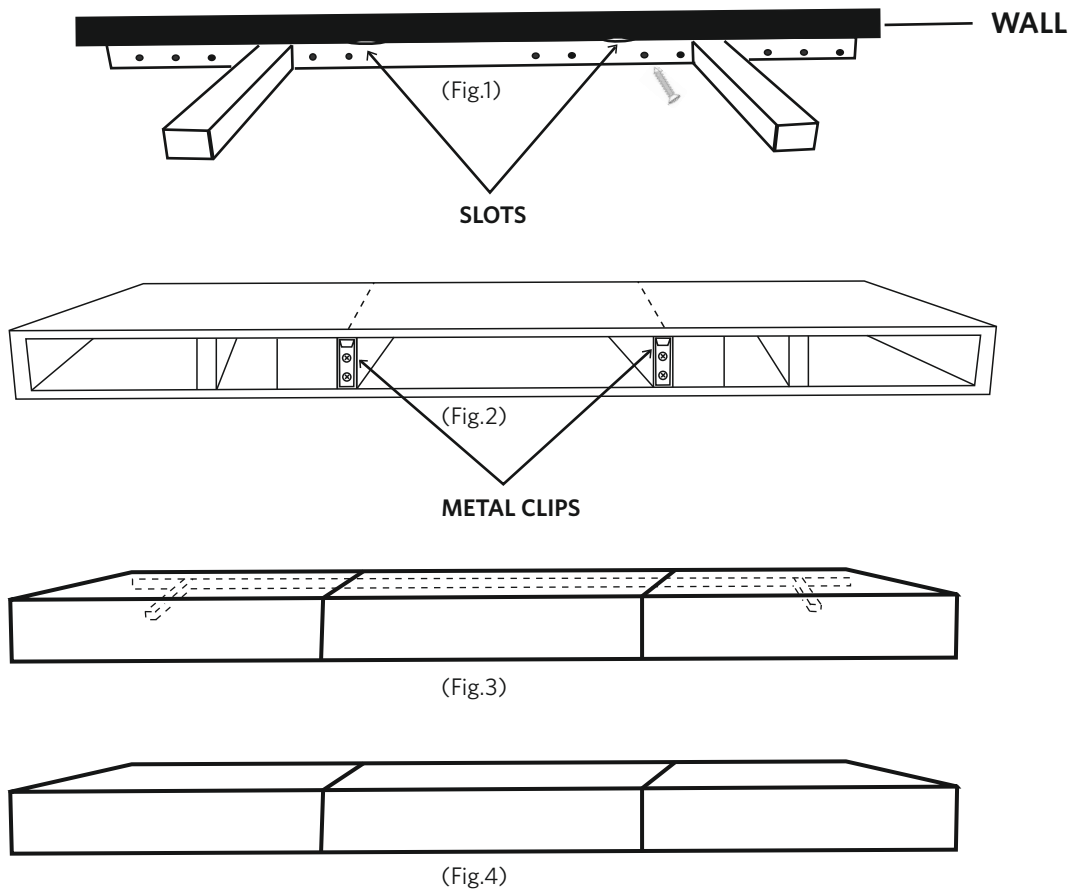

PARTS INCLUDED

A [1] SHELF
B [2] MOUNTING BRACKET

NO.	ITEMS	DESCRIPTION	Qty
1		Screws (C)	4
2		Plastic Anchors(D)	4

ASSEMBLY INSTRUCTIONS:

1. Unpack all parts and place them on a protected work surface.
2. Determine the exact location of shelf and mark its placement on the wall surface using the holes in the metal mounting bracket (B) as a guide, ensuring levelness. Make sure metal mounting bracket's slots are positioned on the top side (Fig. 1). (Please note: For safety, it is best to mount the shelf to at least one wall stud, located with an electric stud finder. Professional installation is recommended.)
3. Drill pilot holes on each marked location on the wall. Each hole should be just large enough to accommodate the anchors (2). Insert anchors into the holes on the wall. A minimum of four anchors should be used per shelf.
4. Install the mounting bracket on the wall using screws through the bracket and in to the wall and anchors (Fig. 1).
5. Check that the mounting bracket is securely screwed into the wall.
6. Slide the shelf on to the mounting bracket, inserting it all the way until the metal clips are locked with the slots in the wall bracket (Fig. 3).
7. Installation is complete (Fig. 4).

IMPORTANT SAFETY INSTRUCTIONS

1. This hanging system is meant for drywall/stud-mounting only. If walls are concrete, brick or plaster, please consult your local hardware store for assistance.
2. Professional installation recommended. However, if you choose to install the shelf yourself, two people are recommended.
3. Shelf supports a maximum of 20 lbs of loaded weight.
4. Never sit on, stand on or apply heavy pressure to the shelf.
